

The ER isn't your only option

Find the right place to go when you need to see a doctor quickly

Your primary care doctor is usually the best place to start when you need care. After all, they know your story. But you have other options for non-emergency care — even in the middle of the night. Make a plan now, so you're prepared when you need to choose care in a hurry. And remember, going to the emergency room (ER) or calling 9-1-1 is always best when it's an emergency.
